

Cole Richards

Statistics & Data Science @ UCLA

📍 Santa Monica, CA 📞 (424) 757 3084 📧 milescoler@gmail.com

Profiles	 milescoler	
Summary	I'm passionate about math, coding, and solving real-world problems with data. Lately, I've been diving into machine learning and predictive modeling, working on projects like coastal flood risk prediction and course schedule optimization. I've explored everything from differential equations to optimization, always looking for new ways to make data more useful. I enjoy working with great people and building things - whether it's algorithms, automation tools, or machine learning models - to bring ideas to life.	
Skills	Data Tools	
	Excel, Web Scraping, Data Cleaning, CSV File Handling, Supabase & Firebase Basics	
	Programming	
	Python, R, Data Analysis, Data Structures (Lists Arrays Dictionaries), pandas for data manipulation, ggplot, Basic Algorithms (Sorting & Searching)	
	Machine Learning & Data Science	
	Predictive Modeling, Time-Series Forecasting, Optimization, Basic Model Evaluation, Data Preprocessing, Exploratory Data Analysis, Simple NLP Concepts	
Projects	Spotify Music Analysis Script Python Project	March 2025
	- Developed a Python application leveraging the Spotify API to generate personalized music insights. - Authenticated with users' Spotify accounts to analyze listening patterns, visualizing top tracks, artists, and genres through data visualization with Pandas, Matplotlib, and Seaborn. - Features included audio characteristic analysis, personalized recommendations, and exportable reports showcasing listening trends across different time periods.	
Experience	UCLA Housing IT Inventory Specialist	August 2024 - Present Westwood
	- Managed inventory and streamlined records for all IT equipment within UCLA Housing and Hospitality. - Accurately tracked technology assets, processed incoming shipments, and updated inventory databases to maintain precise records. - Assisted in implementing predictive analytics strategies to optimize restocking processes and ensure timely availability of essential technology. - Handled initial setup, configuration, and device management for mobile phones deployed to campus staff, ensuring seamless operation and support.	
	Esperer Holdings Accounts Analysis & Development	October 2020 - October 2021 Santa Barbara
	- Automated daily data extraction and feature analysis in Excel, streamlining client outreach for thousands of accounts. - Improved tracking systems, saving the company hours of manual work while enabling client credit tracking alongside existing processes. - Trained the entire team on the new method, making operations more efficient. - Learned the value of efficiency, adaptability, and finding smarter solutions to everyday problems.	
Education	Santa Barbara City College Mathematics and Computer Science 3.98 GPA	August 2022 - May 2024 Associates Degree
	University of California, Los Angeles Statistics & Data Science	September 2024 - Present Bachelor of Science
Awards	President's Honor Roll Santa Barbara City College	May 2024
